30-Day SEC Yield is a standard yield calculation developed by the Securities and Exchange Commission that allows for fairer comparisons among funds. It is based on the most recent 30-day period. This yield figure reflects the interest earned during the period after deducting the Fund's expenses for the period. It does not reflect the yield an investor would have received if they had held the Fund over the last twelve months assuming the most recent NAV.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Please call 800.826.2333 or visit vaneck.com for performance current to the most recent month ended.

The "Net Asset Value" (NAV) of a Fund is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Investors should not expect to buy or sell shares at NAV.

**Index data from inception to May 31, 2024, reflects that of the ChinaBond China High Quality Bond Index. From June 1, 2024, forward, index data reflects that of the Fund's underlying index, the FTSE Chinese Broad Bond 0-10 Years Diversified Select Index and is not intended for third party use. Returns reflect temporary contractual fee waivers and/or expense reimbursements. Had the ETF incurred all expenses and fees, investment returns would have been reduced. Investment returns and ETF share values will fluctuate so that investors' shares, when redeemed, may be worth more or less than their original cost. ETF returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV.

An investment in the Fund may be subject to risks which include, among others, RMB Bonds, Bond Connect, Renminbi currency, Chinese Banking Industry, PRC tax, sovereign bond, financial sector, government-related bond, interest rate, subordinated obligations, foreign securities, emerging market issuers, cash transactions, market, operational, sampling, index tracking, authorized participant concentration, no guarantee of active trading market, trading issues, passive management, fund shares trading, premium/discount and liquidity of fund shares, non-diversified, index-related concentration, and high portfolio turnover risks, all of which may adversely affect the Fund.
