The performance data quoted represents past performance. Past performance is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Please call 800.826.2333 or visit vaneck.com for performance current to the most recent month ended.

The "Net Asset Value" (NAV) of a Fund is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Investors should not expect to buy or sell shares at NAV.

As of March 31, 2025

Fundamentals*

Effective Duration (yrs)	4.65
Years to Maturity	7.31

*These figures represent weighted averages. Effective Duration measures a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield, and is appropriate for bonds with embedded options. Years to Maturity is the period of time for which a financial instrument remains outstanding.

Investing in "green" bonds carries the risk that, under certain market conditions, the Fund may underperform as compared to funds that invest in a broader range of investments. Investing primarily in "green" investments may affect the Fund's exposure to certain sectors or types of investments and will impact the Fund's relative investment performance depending on whether such sectors or investments are in or out of favor in the market. The "green" sector may also have challenges such as a limited number of issuers, limited liquidity in the market and limited supply of bonds that merit "green" status, each of which may adversely affect the Fund.

Index returns are not Fund returns and do not reflect any management fees or brokerage expenses. Certain indices may take into account withholding taxes. Investors can not invest directly in the Index. Index returns assume that dividends have been reinvested.

†Credit quality ratings are measured on a scale that ranges from AAA (highest) to D (lowest), and are based on credit ratings from S&P and Moody's. If more than one rating is available for an underlying security, the lower of the two ratings is used. If a bond issued by a national government, national government agency or supranational issuer is not rated, the issuer's credit rating will be used. If two issuer ratings are available, the lower of the two is used. If only one rating is available in all scenarios, we will use the rating provided. If no rating is available, the security will be not rated. Not rated securities do not necessarily indicate lower credit quality. Below investment-grade is represented by a rating of BB and below. Ratings and portfolio credit quality may change over time.

An investment in the Fund may be subject to risks which include, among others, green bonds, special risk considerations of investing in Asian, and European issuers, foreign securities, emerging market issuers, foreign currency, credit, interest rate, floating rate, high yield securities, supranational bond, government-related bond, restricted securities, securitized/asset-backed securities, financials sector, utilities sector, market, operational, call, sampling, index tracking, authorized participant concentration, no guarantee of active trading market, trading issues, passive management, fund shares trading, premium/discount and liquidity of fund shares, and index-related concentration risks, all of which may adversely affect the Fund. Emerging market issuers and foreign securities may be subject to securities markets, political and economic, investment and repatriation restrictions, different rules and regulations, less publicly available financial information, foreign currency and exchange rates, operational and settlement, and corporate and securities laws risks.
