

Access SMID Caps with Confidence

SMOT

VanEck Morningstar SMID Moat ETF

Small- and mid-cap (SMID) stocks are an attractive segment of the U.S. equity market, having historically provided greater return potential than large-caps. However, large- and mega-caps have dominated market performance for several years. This leaves SMID cap stocks looking attractively priced relative to their large-cap peers and offering an attractive entry point for investors.

However, investors should be mindful when making an allocation to SMID cap stock as many are trading at low valuations for good reason.

Why SMOT?

SMID Moat Companies

U.S. small- and mid-cap companies with long-term competitive advantages

Focus on Valuations

Targets companies trading at attractive prices

Morningstar's Equity Research

Valuations Create an Attractive Entry Point

SMID Cap Forward P/E Relative to Large Cap Forward P/E
Jan 2004 - Dec 2024

Source: Bloomberg. SMID Cap Stocks represented by the Russell 2500 Index. Large Cap Stocks represented by the S&P 500 Index. See disclaimers and descriptions at the end of this presentation. Index performance is not illustrative of fund performance. It is not possible to invest directly in an index. Past performance is no guarantee of future results.

SMID Caps Have Benefited in Rate Cutting Cycles

Looking forward, smaller companies have historically benefited more during rate cut cycles, as cheaper borrowing costs fuel growth and expansion, often leading to stronger earnings growth. As monetary policy loosens, investors typically rotate from safe, large-cap investment to higher-growth opportunities such as SMID caps.

Source: Morningstar. Small caps, mid caps and large caps are represented by the S&P Small Cap 600 Index, S&P Mid Cap 400 Index, and S&P 500 Index, respectively. Periods of rate cuts start in 1995 and cover the following 5 periods: 7/6/1995, 9/29/1998, 1/3/2001, 9/18/2007, and 8/1/2019. Periods greater than one year are annualized. Index performance is not illustrative of fund performance. It is not possible to invest directly in an index. Past performance is no guarantee of future results.

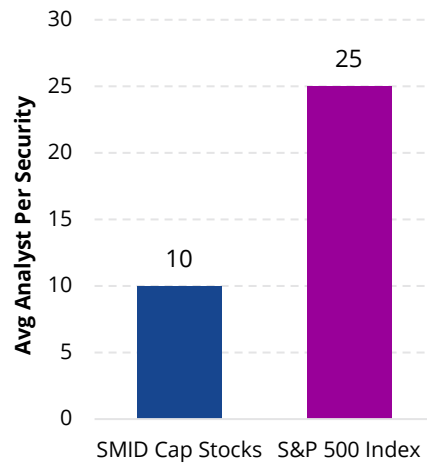

The SMID Cap Universe is Substantially Larger with Fewer Analysts

SMID cap stocks can be inefficient owing to the lack of institutional coverage compared to large cap companies. A strategy that selectively identifies stocks may be more prudent than a broad-based market approach. Leveraging Morningstar's rigorous equity research, the VanEck Morningstar SMID Moat ETF (SMOT) provides thoughtful exposure to SMID cap stocks, targeting companies with long-term competitive advantages and attractive valuations.

U.S. Equity Market Cap by Count

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Please call 800.826.2333 or visit vaneck.com for performance current to the most recent month ended.

The "Net Asset Value" (NAV) of a Fund is determined at the close of each business day, and represents the dollar value of one share of the fund it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Investors should not expect to buy or sell shares at NAV.

S&P 500® Index: consists of 500 widely held common stocks covering the leading industries of the U.S. economy. The S&P 1000® Index represents a broad benchmark for the mid- to small-cap segment of the U.S. equity market. Morningstar® US Small-Mid Cap Moat Focus IndexSM: consists of small-mid cap U.S. companies identified as having sustainable, competitive advantages, and whose stocks are the most attractively priced, according to Morningstar. Morningstar® US Market IndexSM: covers the top 97% of market capitalization of the U.S. equity markets. Russell 2500 Index: measures the performance of the 2,500 smallest companies in the Russell 3000 Index, with a weighted average market capitalization of approximately \$4.3 billion, median capitalization of \$1.2 billion and market capitalization of the largest company of \$18.7 billion. S&P Small Cap 600 Index: seeks to measure the small-cap segment of the U.S. equity market. The index is designed to track companies that meet specific inclusion criteria to ensure that they are liquid and financially viable. S&P Mid Cap 400 Index: provides investors with a benchmark for mid-sized companies. The index, which is distinct from the large-cap S&P 500, is designed to measure the performance of 400 mid-sized companies, reflecting the distinctive risk and return characteristics of this market segment.
